

Docket No.: ZTP03P01872
Application No. PCT/EP2004/053355
Prel. Amendment dated June 9, 2006

Remarks:

The preliminary amendment is being filed in an effort to present an application in proper U.S. format and to present claims in proper U.S. claim idiom for examination.

The newly entered claims are fully supported in the original claims and in the replacement claims filed in the international application.

An early action on the merits is requested.

Respectfully submitted,

For Applicants
